Claims 16-26 are presented for examination.

The amendments and remarks filed on February 24, 2003 have been received and entered.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Claims 24-26 are objected to because of the following informalities: the claims instead of being self explanatory, refer to a portion of the specification for the chemical structure of the compounds used. Appropriate correction is required.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dolpin et al. (U.S. Patent 5,648,485). Dolpin et al. Teach the use of the claimed type compounds of with S1-S4 substituted phenyl group, which can be Para or Meta. The above reference differs from the claimed invention in mentioning that two of S1-S4 is Para substituted phenyl group. It would have been obvious to a person skilled in the art to pick any isomers covered by the general teaching of Dolpin et al. and expect the same type of activity in the absence of evidence to the contrary.

One skilled in the art would have been motivated to employ the teachings of the above reference, since it relates to the claimed type compound encompassing all the positional isomers. To pick specific isomers of a compound is considered to be within

Art Unit: 1614

the skill of artisan in the absence of evidence to the contrary. Applicant has presented no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such, claims 16-26 are properly rejected under 35 U.S.C. 103.

Applicant's arguments and remarks have been carefully considered, but are not to be deemed persuasive. Applicant's arguments regarding the restriction requirement are not deemed to be persuasive for the following reasons. The compounds of claims 16-26 do not require the composition and method of use claimed in claims 27-30 for patentability. The composition and method of use of claims 27-30 do have utility by themselves and can support it's own patent. For the above reasons the restriction requirement is proper and is made final.
